

UPGRADE YOUR RESPONSE TO RAILWAY EMERGENCIES

Rail emergencies are rare in Canada. But when they happen, you need to be at your best. The Railway Association of Canada (RAC)'s Railway Emergency Response Courses can help!

JUNE 1ST-5TH AND SEPTEMBER 21ST-25TH, 2020
JUSTICE INSTITUTE OF BRITISH COLUMBIA (JIBC) FIRE AND SAFETY CAMPUS, MAPLE RIDGE, BRITISH COLUMBIA

These must-attend **40+ hour courses** are geared to: railway and industry personnel, first responders, emergency response contractors, and regulators. Participants will get specialized, rail-based emergency response training that will complement technical responses to dangerous goods incidents.

Get the latest local (Canadian) information from skilled instructors of varied backgrounds.

Learning is in-class and hands-on.

Don your personal protective equipment and get the most out of the JIBC's world-class facilities.

You'll see firsthand site assessments, tank car valving, transfer techniques, plugging holes in leaking tank cars, and the flaring of live product from a tank car.

The week culminates with a **mock derailment scenario** that involves a "release" of dangerous goods where you and your fellow participants will be on the frontlines.

The week wraps up with a final exam and critiques.

WHAT YOU'LL LEARN

- SITE ASSESSMENT & SAFETY
- INCIDENT COMMAND
- TANK CAR ANATOMY, VALVING & DAMAGE ASSESSMENT
- PLUGGING & PATCHING
- CAPPING KITS
- TRANSFER TECHNIQUES
- FLARING TECHNIQUES
- STATIC ELECTRICITY CONTROL
- **NEW** INTRODUCTION TO FLAMMABLE LIQUIDS
- TDG REGULATIONS
- RAILWAY SAFETY
- DERAILMENT SAFETY
